INFORMATION & COMMUNICATIONS -NETWORKED

Network Computing - An Introduction

Network Computing is the UK's longest-established publication dedicated to network management. Since its launch in the early nineties it has been a constant presence and a leading authority, guiding generations of Network Managers through periods of momentous change.

Network Computing continues to lead the debate, examine the hype and communicate best practice associated with all aspects of running a network. The publication covers the latest technology along with the benefits and challenges of implementation. Importantly, there is also content designed to help organisations make best use of their existing resources. Through this balanced and practical approach, Network Computing helps its readers to make better informed purchasing decisions no matter where their organisations are on their digital transformation journey.

Circulation and Readership

Network Computing is currently produced digitally in the form of a monthly newsletter and a quarterly magazine. In 2023 the average size of the distribution list was just under 41,000.

WEB BANNERS

Files should be provided in gif format or flash with all url's embedded and targets set to _blank (opens new window)

Network Computing is one of the few IT publications in the UK that commissions and publishes independent reviews of hardware, software and services. These reviews introduce the solutions to readers and also generate valuable marketing collateral for the vendors and their channel. Give your solution the exposure that it warrants by booking it in for review today.
